ALKIN MAYSTOROV

FRONT-END WEB DEVELOPER

PERSONAL PROFILE

Hello, my name is Alkin Maystorov. I am an aspiring Front-End focused Web Developer, knowledgeable in backend technologies and services such as Node and Firebase. I love building Websites and Web Applications using contrasting web technologies along with solving problems for different niches and industries using the power of technology. Clean code and the room for never ending improvement excite me and keep me wanting to learn more. I aim to find a role as a intern/junior web dev and work together with a team that I can get along with to grow the company name. I will love to hear from you. Whether it's a project, job opportunity or just a chat. All of my projects can be found on my Github and feel free to contact me.

WEB DEVELOPMENT PROJECTS

Projects

The Horde | App Site: Click Me | App Repo: Click Me

- This is a platform build for helping a small team to better organize and manage their responsibilities when building a new app or adding features to an existing one.
- Tools used: React, JavaScript, Firebase, CSS
- Test account: testUser@mail.dev, 123456

GameSpot-API | App Repo: Click Me

- This is a backend API for keeping track of and adding new games, customers and rentals to the database of a video game rental service. The project utilizes all of my best practices for clean and reusable code, error handling, unit and integration testing.
- Tools used: JavaScript, Node, Express, MongoDB, Mongoose and more.

Speedify | App Site: Click Me | App Repo: Click Me

- A fully responsive, animated and very fast template for a cloud hosting service.
- Tools used: HTML, CSS, JavaScript

WEB DEVELOPMENT EDUCATION

Full Stack Web Development Graduate

IronHack Berlin | Mar 2021 - May 2021

- 9 week intensive web development boot camp.
- Developed and deployed various projects applying the git flow workflow methodology.
- Conduct day-to-day project coordination, planning, and implementation across multiple teams.
- Built front end projects using HTML, CSS and Bootstrap.
- Built full stack projects using Express.js, Node.js, Handlebars, MongoDB, Axios and more.
- Built a single page application using React Js.
